COMMENTARY

The mathematical study or treatise of measure is metrology, in the Bible we find measures of weight such as the gomer, ephah, Hin, etc. Literal measures such as the cubit, cane, stadium, etc.

Measures are universal, useful to humanity in many things to make mathematical calculations and measurements, astronomical, biological, geographical, etc.

There is no doubt that man was made in the image and semblance of God at the beginning, and these qualities pursue us as the Eternal in His nature employs measures, in creation and the foundation of the earth, in the construction of the temple that Solomon built, in the counting of the hours established in the day John 11:9. In the measure of time of the divine feasts Leviticus 23:4. In the end we will see some aspects of the measures of the word of God, may the Eternal will us to be in his measure.
