COMMENTARY

The use of makeup is very ancient, but it was not until the XIX century that it increased considerably. Today, through the use of make up, the face of a person can be completely modified, the experts in this say that make up must be discreet, soft, and delicate; however, today the term cosmetics is very well applied, as its roots come from the greek "Kosmos", which means world.

Let us examine this topic so to not fall in errors that may get to fail the principles of our God (1 Corinthians 10:23).
